

Raw Honey From The Balkans

Raw Honey

Raw honey is the natural product of honeybees, containing all the natural nutrients and enzymes of the original nectar. It is not heated, filtered, or chemically treated, preserving its natural properties and health benefits.

Benefits

Raw honey has a long history of use in traditional medicine. It is known for its antibacterial and antifungal properties, making it an effective natural remedy for various ailments. It also helps in wound healing, soothes sore throats, and acts as a natural sweetener.

Production

At Balkan Wild, we ensure the highest quality of raw honey. Our bees forage on the diverse flora of the Balkans, collecting nectar from various flowers. The honey is then harvested and processed using traditional methods to maintain its natural purity.

Quality Control

Our raw honey undergoes rigorous testing to ensure it meets the highest standards of quality and safety. We use modern technology to analyze the honey's composition and verify its natural origin.

Availability

Our raw honey is available in various quantities, from small jars to larger bulk orders. You can find our products in health food stores, gourmet markets, and online.

Balkan Wild Honey

Raw honey is a natural product of honeybees, containing all the natural nutrients and enzymes of the original nectar. It is not heated, filtered, or chemically treated, preserving its natural properties and health benefits.

In the industry of extracting and packing, great care is being taken to preserve the authenticity of the honey. We have strict control on the quality of the honey, and ensure that it is pure and natural.

Availability

Raw Honey From The Balkans

Wild Flower Raw Honey

The rich, amber honey is extracted from numerous wild flowers and plants including wildflower, clover, chestnut and acacia.

Dark Monofloral Honey

The honey is dark and rich with a strong, earthy flavor. It is made from a single source of flowers.

Acacia Honey

This honey is light and delicate with a light color and very fine texture. It is made from acacia flowers.

Linden Honey

The honey is light and delicate with a light color and very fine texture. It is made from linden flowers.

Circassian Honey

Collected from the Circassian region, this honey has a rich, dark color and a strong, earthy flavor.

Lavender Honey

Bulgaria is the largest producer of lavender oil in Europe, and this honey is made from the flowers of the lavender plants.

Raw Honey From The Balkans

Wild Flower Raw Honey

BEST SELLER

This rich, amber honey is collected from pastures of wild flowers and herbs, including wild thyme, peppermint and spearmint, chamomile, milk-thistle, clover and lemon balm.

Its flavour is multi-layered and herbal with a touch of wild mint.

Oak Honeydew Honey

BEST SELLER

Honeydew honey comes from tree sap. Its unique properties include extremely high antibacterial and antioxidant properties, equivalent to those of Manuka.

The honey is dark and malty, with a taste and colour similar to that of molasses.

Acacia Honey

BEST SELLER

This exclusive and sought-after monofloral blossom honey has a light colour and very fine aroma, with a fresh and delicate taste.

Acacia honey has a high fructose content, making it very sweet and preferred by people with glucose intolerance.

Linden Honey

In early summer the bees feast on Linden blossoms; the trees buzz and the air is heavy with the thick scent of the abundant yellow flowers.

Linden honey has a delicious, unique taste, just like the blossom itself.

The honey is thick and dark gold.

Coriander Honey

Gathered from coriander blossom, this honey has a distinctly rich, sunny, herbal taste that beautifully complements breakfast superfood smoothies and muesli, and is the perfect, healthy addition to sauces and marinades.

Lavender Honey

Bulgaria is the largest producer of lavender oil in Europe, with its own indigenous varieties, and this particular harvest is taken from acres of lavender fields in the south of Bulgaria.

You'll love this dark gold, creamy honey with its thick, luxurious texture and distinct floral taste.

Balkan Wild honeys are all sourced from small family run apiaries situated in the **Central Balkans**.

Far from large scale agriculture and industrial human activities, the bees collect **pure natural honey** from wild flowers and forest blossoms, such as Acacia, Linden and honeydew from Oak.

In the process of extracting and bottling **great care** is being taken to preserve the authenticity of the honey. We use slow gravity driven mechanical methods of extraction and filtering. The honey is being bottled straight away **without any thermal or chemical intervention**. That way you get the honey just as the bees have packaged it - **completely pure and raw**. Raw honey contains pollen, enzymes and traces of propolis. It naturally crystallises, and should be gently melted in a bain-marie or a sunny windowsill, to avoid damaging its live properties.

We keep a stock of honey with a few of the best suppliers in your region.

If there is no dealer in your region, please contact us and we'll send you the honey you want.
